Create an account in Sendgrid

The screenshot shows a web browser window with the SendGrid dashboard. The browser's address bar displays `app.sendgrid.com/guide?from=profile&integrate=true`. The dashboard features a left sidebar with navigation links: Aadharsh S.M., Dashboard, Email API, Marketing, Design Library, Stats, Activity, Suppressions, Settings, and Twilio SMS. The main content area is titled 'Welcome, Aadharsh!' and includes a blue banner that reads 'Send your first emails with Twilio SendGrid'. Below this, the 'Create a sender identity' section explains that a sender identity is needed before sending emails and offers two methods: 'Create a Single Sender' (highlighted with a blue button) and 'Authenticate a domain instead'. An illustration shows an email header with 'Your Business' as the sender and '<jane.doe@your_business.com>' as the email address. At the bottom, a message states 'Please create a sender identity before sending your first email.' The Windows taskbar at the bottom shows the date as 15-11-2022 and the time as 11:09.

Welcome, Aadharsh!

To get up and running quickly, please follow the steps outlined below.

Send your first emails with Twilio SendGrid

Create a sender identity

Before sending email, you'll need to create a sender identity. There are [two ways](#) to do this, but we recommend creating a Single Sender to get set up quickly and test your email integration.

[Create a Single Sender](#) [Authenticate a domain instead](#)

Your sender identity is the "from" email address your recipients will see in their inbox. [Learn more](#) about this.

Your Business <jane.doe@your_business.com>
to me

Send your first email

Please create a sender identity before sending your first email.

Thank You
